PROJECT Kick-off Document by Afsaneh Cooper [Project Manager]

Dear Prince Andrew Albert Windsor, The Duke of York

Hi HRH Prince,

As you are aware from my three applications of **community initiative, Pitch@Palace-Global and Pitch@Palace-Australia [Perth-Western Australia]**, I am an entrepreneur. However, my first task to be done is my marital status being divorced [under Australian law] and Annulled under my religion [Shi'a Islam] to be able to live more comfortably as far as my projects in engineering are concerned.

You offered to me an option to first become member of Royal Family by payment of 2,000 British Pound [two thousands], then after that payment we travel soon to China to visit factories for 3 projects I lodged to your website: <https://pitchatpalace.com> during last month. This trip is very necessary for my project as I was in two libraries of Shanghai and Guangzhou for two months with no tourist attraction places visited. I mainly spent most of my time at these two libraries, took several slides of one very big factory having 6 buildings, visited three galleries and concise their catalogues and had meetings with staff of these factories to discuss their products qualities.

Therefore, since I did not know how to manage the sale with the stakeholders at Guangzhou and how to deal with shipment cost when products and locations can create

Monday, 14 October 2019

extra cost, I returned to Australia after 60 days to do my work for my products research in Australia. Now my research is ended to several options one was your website pitch@palace another is course: Graduate Certificate in Education-Global Learning, Another Flinder University e-library, also the PowerLab in Denmark University of Technology. For the stakeholders of my products:

1. Dr Zakerzadeh from Faculty of Mechanical Engineering in Tehran - Iran today announced he is still happy to work as my mechanical engineering supervisor for all rotor Dynamics and even wind turbine, River turbine, Rail Car, and Flywheel Energy Storage system. I rejected to continue with Dr Gharlali as recently her husband had aggressive behavior in my Phone call and took the phone handle from his wife started shouting at me asking me questions which I did not respond and hung up. Dr Zakerzadeh was always cooperative and polite and is 20 years younger than me. He is a man who is married with young children. His supervision would be global. At this point of time he stays in Tehran and waits to receive a call from you whenever he is in demand. I would work as usual in engineering research but when I need an assessor at end of my writing, he is in demand. He would respond by himself. In my today's call to him I mentioned to him this project at this time is secret due to intellectual property, if it was needed the project sponsors would contact him directly. I mentioned I have used his contact details in my application for the project. He does not know who project sponsors are as I have just said what I wrote here.

2. Please remove Dr Kobra Ghar-ali from my list of PhD supervisors in my three PhD applications.

3. Regarding my payment for your calculation of the cost of 3 project I lodged please consider the following services costs for just myself:

4. All services for engineering, project management, Travel cost including accommodation for one person in China are as follows:

a. Accommodation, 3 meals per day, METRO Rail trip are: \$40/day of stay in China for me.

b. engineering services are listed in attached **file: 12. Ebot_Study Plan.** A University in Helsinki of Finland is chosen as example in conjunction with Charles Darwin University as example. Also please see <http://www.ewindfly.net> please use Browser of Google Chrome to open this website until I update my information on domain website. The host for my Ewindfly website is Weebly.com which is on web store in Google Chrome. MSN clouds and Domains block Google Web store products. So, I use Yahoo for my business email. My Face Book is now deactivated, but every week I check my FB Friends comments not more as FB is taking too much time and in Project Management is risk! My FB is mainly for my relatives News and my very close friends. Once a week is all I require to open my FB Account.

C. University of Technology in Finland does not have fees for students even in PhD course. I chose this University for this reason to manage Rat Universities of 20's which they have very expensive fees for foreign students, and they lie to students by considering only **male** engineering and administrative staff's interest to choose a student's not the idea written in applicant's PhD proposals. I have had enough of over 500 male engineering staff who lied on their profiles about their research interest and made me to write to them, but they ended lie and hide when it was required response. Also, many universities stole my ideas and they **rejected** my applications. These difficulties have motivated me strongly to establish my own research School based in 64 Calley Drive, Leeming, WA, 6149 and restrict my students to only women engineers and

Monday, 14 October 2019

choose my topics only in PhD course. Then I am generous to give away all male engineering staff to other Australian Universities. Also, I will decrease my fees for PhD course too much as my Research School is called: Fish University of 30's and is very much different from Rat University of 20's. These differences are all my secrets. Otherwise people would steal my ideas if I tell the differences **to them to take** all funding for themselves.

d. For my "University Research School Operation" type Family Partnership [me and my son] I need to pay **AU\$8400** to Australian Government if I start charging fees from my PhD students. They also expect me to obey their rules.

e. I have chosen only two venue for my research school lecture theatre, Seminar venue, charging laptops, Charging mobiles, Desks, Chairs, eLearning facilities, Accommodation for 4 weeks in a year, meals, café, recreation, etc. That is "Guangzhou Library in Jujiang New Town of city of Guangzhou, State of Guangdong. This is because I lived in that city, lived in Australia 31 years, lived in Chengdu, lived in Shanghai and passed by train from **along** 6000 km railway which connected these three cities to each other. My trip to China ended **having** with nearly 20 very kind friends. All these friends helped me to manage my goal for opening my Research School tasks. I have not received any support after 1994 withdraw from my 5 years long PhD course to just attend hospital and move to capital city to complete same PhD course **from** 28 universities I applied since Aug 2016 so far and even during 1994-2016. Also, in Iran and 16 global Universities I officially applied for re-enrolment no body supported me for enrolment, but they allowed Dr Zakerzadeh supervise me. At Charles Darwin University Dr Jon Mason accepted to supervise me in my PhD **course** and accepted **to cooperate** University of Tehran, but the Dean of Graduate Research School announced with bad tone she needs resources to let me re-enrol in my PhD course. SATAC which enrolls students in Graduate Certificate in Education-Global learning assessed my application competent and let me enroll, but since the beaurocratic Administration of Charles Darwin did not respond to my question to make their communication by phone free to record by me I withdrew from my only one unit but I kept myself enrolled in that brilliant course for seeking a solution to join that course to my future PhD course. I chose **University of Technology in Helsinki in**

Monday, 14 October 2019

August 30, talked to the Dean of engineering, prepared my application and covering letter to that Dean, but I did not send that email to search for an opportunity which was in China for teaching English globally. However, this was interrupted by some destined incidences which I just dealt with in a long-time method, rather than quick solution. My covering letter to **LUT** is **attached [files 4, 7, 6]**.

f. I am not interested to **provide** educational services to UAE and KSA PhD students. My private engineering students in the past were not happy with lack of freedom of speech and freedom of press in these two countries. Also, people on social media of Instagram were several times complained in their comments for "**pitch@palace comments**" that their previous comments were removed. Therefore, I have decided that UAE and KSA are suffering from Rat Universities of 20's too, but their problem is mainly in two issues which I do not tolerate. These type countries waste my time as engineer and interrupt my engineering projects by stealing ideas from me and removing my comments which might be a new idea to use them for themselves for showing up. I sent my PhD proposal for TAH [Total Artificial Heart] to a University in UAE during 2017-2018 but no response was received. **I have seen** a pitch@palace in UAE with an Artificial Heart as innovation owned by their students left in a museum for their idea. Same project had been sent to Australian Universities during 2017-2019 too. I would appreciate to get students from other countries in ASEA [NO Arabic AS FIRST LANGUAGE]

g. In the past I have researched the top universities which provide services for PhD students in the research field I am skilled in those areas. I have ranked them well and based on those ranking my PhD students would be short listed. None of those universities include Arab Universities such as UAE and KSA. These countries do not value my research field and have no ranking in my research areas. Since the main goal of these students from Arab countries are settlement in Australia, or investment in Australia, I am not interested in these type researchers. Please see tab: **Universities World**

Rank in my website: <http://www.ewindfly.net> My ranking only covers universities which have good ranking in my research field and none include Arabic countries. I am happy to get students from UK.

h. My students might come and live in my home. Therefore my 30 pages policy which I wrote by experience I gained during June 2010-June 2016 would be used to manage the residential affairs of my students. We might get male students to live in my second block of my home which is in L-Shape and **is lockable** from another block by a common door and wall. The Arabian male students never chose my shared **home**, which was full of boys under 35 mainly because of my nationality. Therefore, I consider deleting 135000 traditions of 12 Imams in Shia Islam from among traditions in Sunni Islam has caused social science disappears in Sunni Islam libraries. I am not a **"social scientist"** to spend my time fixing heads of **arrogant** people. Our residential policy only received 7% opponents and 93% were happy with our policies. A father from Norway offered me \$5000 to keep her son [year 2 in Podiatry] but I rejected. I locked the front security door to him. However, I did not complain against him as our policy was very well managed and planned. We cannot please 100% of our boarders. I know the Arab Students would be among the 7% of our opponents. ECU Provost was one who never accepted my appeal against one unit [Dr Omari-Arab academic], Ombudsman and EOC Accepted to deal with my appeal also guild of students.

l. My tenancy policy is secret, and this idea might be stolen. We had no problem with police in our area and they always supported me during 2010-2016. <http://rent.shubayr.net> is our rental which is deactivated to let my PhD course be enrolled and my second China Trip happen as Krystal is

Monday, 14 October 2019

waiting for me in China to transact for the product of my PhD thesis with Associate Professor Jon Mason. Our accommodation cost with Diet breakfast and Dinner included [City Train Home 105 item menu is also my secret] and provision of Work Swap for Rent for boarders in over 80 projects has converged to only 7 Projects, all Renewables. These projects are also secret. The cost for each boarder is only \$211 per week. The rate for swap is also secret. Boarders are chosen among 30 options in the available market and may be none are selected with loss in business, to achieve projects success such as finding an engineer rather an accountant. Also, a Doctor of Medicine might be chosen to increase work for a homeless. This is not to gain charitable fund, just for projects success reasons. This method is not favorite among businesspeople but is favorite by engineers and homeless young boys under 35. Therefore, the financial loss in 6 years was compensated by studying project management, Training and Assessment and TESOL with very heavy research work and academic activities during Feb. 2016-Sept 2019.

J. Pitch@Palace..., Flinders University Dean, Dean of LUT, METRONET Seminar in Hyatt's hotel on 12/12/2018, TESOL Companies in China, Draft Companies in Western Australia, etc. and upgrading my small business in January 2019 to include "Research School in Renewables" which since 1990 has been my research field and new course "global learning" which Dr Jon Mason teaches, are all gates of success for my 13 activities as follows:

1. Research School@Fish30's_Project1

>> Please click on Tab: **Courses** 2018

7. Library: Wentworth Street cnr Beeliar Drive, Cockburn Train

Station 2019

Monday, 14 October 2019

Flinders University e-Library, Stockland Shopping Centre [Bull Creek library]
2019

8. Administration: Voice and video recording, Excel Rental
Planning 2010-2016

9. Students www.ewindfly.net >> Please click on Tab: World Universities
Ranking, only 1-20/annually 2018

extras: Sold to Australian/Partners **Rat Universities of 20's** [cost:
Commission (Marketing: \$35/hour)]

10. Shopping Mall

>> <http://www.aliexpress.com> 2016-2019

11. University Fees

>> Cost for [\$20/hour for project management practice, \$84/hour for
presentation/Seminar at Guangzhou Library/seminar, Lesson Planning/ (Course
Learning/Assessment Design: \$125/hour),

Afsaneh's team return travel cost "Perth to China to UK to Kouvola (Finland)" to
Denmark by belt and Road, Aeroplane (AU\$2,200 per person)]

12. Director: Engr Afsaneh Cooper 2005-2019

{Renewable Engineer [PhD_92% completed, Mechanical Engineer (B.Eng.,
M. Eng), Project Management Practice (Cert IV_73% completed) /

Training & Assessment [Cert IV]/ Ed. ICT/Global/TESOL/CAD [45 Units of
Competency]}

13. Substitute in China: Senior Teacher [Biotechnologist, TFL]: Mr. Ahmad Ali Cooper 2010-2019 [my son]

14. PhD Proposals "Decision Tree Software Management":

"Recording and Ranking": HRH Prince Andrew, The Duke of York [Global]

K. Could you please arrange a travel to China for "Wind Turbine Investigation" Task between Perth-Guangzhou in which AU\$1200 can be spent on Wind Turbine? I would pay for my personal expenses out of my global Centrelink payment which I achieved in 2018 including accommodation, return ticket Perth-China, 3 meals/day. Murdoch University Research grant during 1990-1994 was only \$1500 which I spent this all on stationaries and payment for papers, reports, books for my PhD research during 1990-1994. Design and Manufacturing was passed into future, which I succeeded during 1994-2019. Professor Jennings retired in 2012, Murdoch University closed my course.

L. Could you please call Dr Tara Barbazon [Dean of Graduate Research School] to act on her promise in messaging me on Twitter Flinders for your Pitch@entrepreneur for Flinders University tweets? She received my email in the last week but has not responded to me yet. My request from you: Could you please arrange my re-enrolment at Flinders-School of Engineering?

Monday, 14 October 2019

M. Could you please arrange that Charles Darwin University let **Dr John Mason** becomes my **Principal Australian PhD Supervisor** at **My research Centre** or **Flinders University** cooperating with **University of Tehran** for my graduation from PhD course. If you need advice for "my background complaints" all **completed** by WA Ombudsman, Victorian Ombudsman and Qld Ombudsman [2017-2019], please contact "Shoshana Halberg at WA Ombudsman: 08-9220 7555" or Qld Ombudsman: 3005 7000 [national code for Qld is missing], Victorian Ombudsman [Ombudvic@ombudsman.vic.gov.au]. About 8000 pages documents are available for your review to see I have completed my work then I established **my own** research Centre for solution. Several PhD students from Universities in Iran are studying in Australia as international students or as volunteer research assistants. **I as Australian Citizen / Iranian Citizen cannot be admitted while I have** no bad record in any of the two countries except enthusiasm for completing my PhD candidature graduation [with 7 semesters grades all "Good Standing", "**Principal referee report**" tells, I was top 20% of PhD course [under load of "**family of 5 commitment**" including myself] an entrepreneur by my CV. Please see my CV attached to this email. I have no "**cut off**" problem for "**pension payment**", after 4 weeks I stayed overseas. "**Centrelink International**" has given me exemption from restrictive rules **for overseas travelers**. My pension is AU\$23000/year, with **no need to increase it for my living expenses**.

N. I am in the process of payment of 2000 [two thousand British pounds] for "**the Royal Family Membership**", which you sent an email to me about it last week. **On Monday 14 Oct**, I would go to my ANZ Bank branch to discuss this subject with them.

Monday, 14 October 2019

Yours Sincerely

Engr. Afsaneh Cooper
