D9

Form 2 – (Affidavit – A – Dividing Fence)

ACDE = Natural ground level zone 4L, area

2766 (N)

2570 (C) = 26.21 #64

2310 (D) = 25.915 #62

change in Natural ground level:

Desai 2766 - 2310 = 456 removed sand

Cooper 2766 - 2570 = 196 removed sand

456 ÷ 196 = 2.327

Cooper = 1

Desai = 2.327

Cooper: 2.327 / 3.327 = 0.300 = 30%

Desai: 1 + 2.327 = 3.327

= 0.699 = 70%

Drawn By: Engines Afanah Cooper

DR12

Limestone Retaining Wall - KLB-2008

Abreviations:

SM = Natural ground level

(C) = Cooper's side yard

(D) = Desai's side yard

Natural ground level of zone 4L

Horizontal line (blue)

LS1-Wall bottom

N = Natural ground level in zone 4L

Desai changed 70% in Natural ground level zone 4L

Cooper changed 30% in Natural ground level zone 4L

ABC = Triangle of Natural ground level

ground level.

ACDE = Area in zone 4L bound by Natural ground level.

Scale: 1:20

length of LS1-Wall

change in Natural ground level in zone 4L

2280 (N)

2260 (D)

2180 (C)

25090

25-82
